

## Narcolepsy Medical Information Card

I have Narcolepsy. A chronic neurological disorder that may cause unexpected sleep attacks.

Narcolepsy may include **Cataplexy**; a sudden loss of muscle control. This can cause a full body collapse. I may not be able to communicate, though I am fully conscious.

### How to help:

Remain calm.

Do not call emergency services unless I have hit my head or am visibly injured. Recovery will occur naturally.

Flip for personal information.
